## **DETAILED ACTION**

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Each independent claim recites a specific feature or features not taught in the prior art, and not considered obvious in view of the prior art. For example, the Lustig et al. method would not be readily modified to accomodate implanting the dopant in the order of steps as now recited in claim 1. In addition, the specific features of both the method steps, and the structure produced by such steps, give rise to advantages as set forth in the specification, for example, as noted at page 2, lines 26-30, a more closely balanced set of transistors, with smaller device size.

Hammond et al. shows a method similar to that of claim 1, except that removal of a silicon layer takes place prior to separation of first and second regions by isolation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to S. Crane, whose telephone number is (571) 272-1652.

The fax phone number for the organization where this application or proceeding is assigned is (571) 273-8300.
